

Week 03 Assignment

Jessica Smith

R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
#install.packages("devtools")  
library(devtools)
```

```
## Warning: package 'devtools' was built under R version 3.5.3
```

```
## Loading required package: usethis
```

```
github_path = "https://raw.githubusercontent.com/jsmith0434/WSU_STATS419_FALL2020/"  
source_url(paste0(github_path,"master/functions/libraries.R"))
```

```
## SHA-1 hash of file is 95a86ef9fd298f7345059642b8cf911c19c92c5a
```

```
## Warning: package 'stringr' was built under R version 3.5.3
```

```
## Loading required package: xml2
```

```
## Warning: package 'xml2' was built under R version 3.5.3
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
